# Appendix E: Style Guide

2<sup>nd</sup> June 2018

## Style Guide

All visual designs should be built using the *U.S. Web Design System*. Details are available here:  
<https://designsystem.digital.gov/>

This design system includes Bootstrap templates for web development and Sketch and Illustrator files for designers.

Any design or front-end development questions should be answered using the *U.S. Web Design System* guidelines. It's preferable to work from these guidelines as opposed to building pixel-perfect recreations of the wireframes we've provided in Appendix D.
